

LANDROID
WWW.LANDROID.CO.UK

LANDROID operates from our modern workshop in Exeter within the heart of one of the largest motor retail locations in the country. With our reputation growing we are quickly developing into one of the UK's specialists in conversions of the iconic Land Rover Defender.

Our existence is based around the premise that there are an appreciable number of Land Rover Defender customers, owners and enthusiasts who wish to enjoy the incomparable utilitarian benefits of the Defender whilst expanding upon features the vehicle already affords, yet are not available in the standard Land Rover offering.

We offer an extensive solution across interiors, exteriors, performance and tech related upgrades. In this regard our work is genuinely customised and an entirely prescriptive and personal service is offered. Our customers can and do become a genuinely important and integral part of the design process for each and every build. Our customers enjoy the individualism, quality and brand equity associated with the LANDROID name.

Our approach is tailored to cover four main areas:

Sales, Sourcing, Restoration and applying the LANDROID treatment to your personal vehicle.

As this suggests we can source you a Defender to meet with your budget as a foundation for your chosen build. Alternatively we can carry out any work required on your existing vehicle to restore, rejuvenate or reimagine your beloved Defender.

At a strategic level, LANDROID adheres to two fundamental trains of thought. Firstly that all work should remain entirely faithful and complimentary to the original vehicle and secondly that we offer excellent value in terms of our pricing structure allowing for the highest standard and quality of work surrounding conversions, upgrades and restoration work.

Wheel Arch Extension For added protection against mud and stone chips. Colour coded +£100.0	£295.00

EXTERIOR HINGE PACK

The original Land Rover Defender hinges are riddled with longevity issues. Due to the construction and materials used rust tends to build up and leak down onto the bodywork staining the paintwork. The hinges are also prone to dropping meaning the doors don't always align properly making it much harder to maintain a watertight seal. We have a permanent and stylish solution to this problem.

Our hinges have been designed and built with high strength Aluminium which in turn is protected with an anodised coating giving a perfectly smooth high strength surface. The hinge is fitted with a centre bolt made from stainless steel inclusive of a thick helical groove which allows the bolt to hold on to the grease and disperse it evenly. Each component of the hinge is exchangeable right down to the friction bearings to allow for easy maintenance. On top of all this we provide a new and improved gasket seal to protect the paintwork of your beloved Defender.

Alongside the hinges for the front doors 2nd row and the rear door we also include replacements for the bonnet and matching window blocks. The bonnet hinges are not only the perfect match for the doors being precisely manufactured but also add a further level of theft protection as the original fitting is improved upon. Add to all this the stainless steel security bolts and you now have even more peace of mind and a next level exterior security aspect.

D90 - £1,995.00

D110 - £2,495.00

EXTERIOR ALUMINIUM PACKAGE

The perfect way to give a quality finished appearance to your Defender. The majority of exterior Land Rover Defender furniture was riddled with longevity issues due to the construction and materials used rust was an integral and overwhelming problem. All the parts in this pack are made from the highest quality billet Aluminium, then finished in hard anodised Black to give an end to stained paintwork while increasing security yet more importantly giving a luxurious individual look to your Defender.

We would also recommend Bulk head removal with this option to give a complete finished station wagon look.

£6,000.00

STARLIGHT HEADLINER

When you climb into your Defender and look up to see it twinkling in a magical way you will realise the Starlight Headliner is the ultimate interior enhancement.

Every constellation is unique

Created from hundreds of fibre optic strands at staggered depths and different gauges it creates an opulent star filled 'sky'. Each 'star' changing in warmth and brightness to give relaxing and subtle feel.

Our Master Craftsmen hand make every hole, fitting the fibre optic lights with precision to ensure that they're set perfectly.

BESPOKE FAST ROAD PACK

Upgrade your Defender increasing the power on to the road, along with a lower ride height and centre of gravity. This gives your Defender better handling and traction along with a more confident drive.

The Fast Road Pack comprises of:

- Power Upgrade to circa 175bhp including more midrange torque
- FOX Racing Shock Absorbers
- Progressive Lowering Springs
- BILSTEIN Steering Damper
- Uprated Front and Rear Anti Roll Bars
- Poly Anti Roll Bar Bushes
- Front and Rear Radius Arm Poly Bushes
- Silicone Hoses
- Performance Air Filter

XS Model £3,995.00

6 POT BRAKE UPGRADE

6 pot Brake Caliper that is specifically engineered for the Land Rover Defender that fits perfectly with 18" Alloys to improve braking performance considerably whilst adding a subtle yet distinctive touch of class to your vehicle.

By increasing the number of pistons from 4 to 6, increasing the size of the brake pads and using those in conjunction with larger vented discs your braking experience is dramatically increased giving on average a 25% reduction in stopping distances.

Specification:

7075 T6 aluminium (aerospace alloy)

Identical pedal travel to OEM calipers.

6pot caliper of varying piston sizes to assist with brake modulation and avoid tapered pad wear

25% increase in brake pad surface area with an additional 25% increase in coefficient of friction

17% increase in brake disc effective radius

35% increase in disc torque.

Wider vented discs for additional cooling

Sulphuric anodised finish for superior corrosion resistance

304 stainless steel pistons,

Grade 12.9 passive zinc plated holokrome hi-tensile steel bolts.

For fitment under 18" alloys.

£3,950.00

DYNAMIC HANDLING PACK

A lot of thought and an incredible amount of development has gone into the production of our Handling Pack.

Reducing the ride height to lower the center of gravity slightly, improving transitional weight transfer rates under acceleration, deceleration and cornering loads. The ultimate aim is to have a more precise and controllable handling set up. Maximizing traction which in turn translates into more engine power being used to drive the car forward, increasing cornering capabilities and also more effective braking.

We use the following components in our Handling Pack:

Front and Rear Anti Roll Bars Zinc Primed & Powder Coated
Heavy duty 28mm construction for reduced body roll.

Poly Anti Roll Bar Bush Kit
This kit offers greater precision, control and more positive handling on or off road

Bilstein Sports Dampers x4
Custom Bilstein gas shocks for improved ride and handling

Progressive Lowering Springs x4
Lowering the center of gravity will provide improved handling and stance on the road

Steering Damper
For improved feel from the road

Front and Rear Radius Arm Poly Bushes
To create a firmer ride

XS Model £2,775.00
Non XS £2,875.00

V8 LS3 CONVERSION

The Corvette LS3 engine yields the highest ever performance levels from a Defender. This conversion alongside the unrivalled technical experience and attention to detail has seen this become a must have conversion for those who want the utmost from their beloved vehicle.

We replace the stock engine and gearbox with a GM derived 6.2l Petrol V8 and 6 Speed Auto Gearbox providing 430bhp and more than 540 NM of Torque at 4,700 RPM. For those who crave more there are further upgrades available providing over 550bhp.

Behind the engine sits a 6 Speed Auto Gearbox that is seamlessly matched to the engine with a unique inbuilt intelligent control module allowing the gearbox to adjust parameters accordingly. The existing vehicle management system is reprogrammed to the new engine and gearbox resulting in all existing instruments and controls being run as used in the standard vehicle.

Optional extras are available - Power upgrade to 550bhp, Steering Wheel Mounted Paddleshift System with Integrated Gear Selection Display, Gulf Spec Cooling System with Double Size Radiator.

430 BHP - 540 NM of Torque at 4,700 RPM

WHEELS & TYRES

5 Spoke Alloy Wheel With BF Goodrich A/T2

Works with iPod / iPhone - With iPod and iPhone Direct Control, you can manage your i-device directly from your car dashboard and enjoy superior sound.

Double Din Dash Fascia included in Piano Black (other colours are available)

£2,495.00

AUDIO ENHANCEMENTS

We have spent a lot of time researching the perfect audio upgrade option for your Defender, through breakthrough technologies we strive to offer the best in car audio experience available.

Starting with the front, rear facing speakers we replace the tweeters with an upgraded version integrating an advanced design dedicated to reducing harmonic distortion bringing a live, natural, rich in detail sound. The midrange speakers are swapped out for a 4" mid bass speaker offering an extended frequency response, both in high and low frequencies. Combining these two sets with a new wiring loom and a dedicated crossover you are delivered with absolute audio performance.

Moving on to the rear, front facing speakers we are introducing two 5.25" two way speakers which feature concentric coaxial tweeter with one single point of sound emission making it possible to obtain a consistent in-phase response delivering sound comparable to a system of separate woofer and tweeter as per the front setup, delivering crisp midrange, accurate treble and beautiful but not overwhelming bass notes.

To include the all needed bass we include two 6.5" 2ohm woofers, developed with nominal impedance with the purpose of exploiting all the power made available by the 4 channel 600W Powersports Amplifier which in itself ensures high rejection against electro-magnetic interferences, for noise free results providing a beautiful rich bass response.

These items combined deliver a deep fundamental tone and harmonics allowing for the ultimate enjoyment and audio experience.

Prices start from £480.00 enquire about your audio upgrade options.
